

TITLE	Advanced Craniomaxillofacial Surgery Tumor, Corrective Bone Surgery, and Trauma 1st Edition
PRICE	€179.99
ISBN	9783132428393
PUBLICATION DATE	March 2020
FORMAT	Hardcover · 1300 Illustrations · 748 Pages · 8.25 X 11 IN
MEDIA CONTENT	Complimentary AO Foundation eBook
SPECIALTY	Oral & Maxillofacial Surgery, Orthopaedics
LEVEL	Practicing surgeons, research fellows

EDITORS

Michael Ehrenfeld

Neal D. Futran

Paul N. Manson

Joachim Prein

DESCRIPTION Featuring more than 1,100 expertly drawn illustrations and images, the *Advanced Craniomaxillofacial Surgery* book is the comprehensive, highly anticipated follow-up to the original work on *Principles of Internal Fixation of the Craniomaxillofacial Skeleton* that was published in 2012.

With detailed contributions from more than 80 renowned international authors, *Advanced Craniomaxillofacial Surgery* significantly builds on the solid foundation laid by the previous textbook. The new book comprises sophisticated techniques in skeletal and soft-tissue analysis for the disciplines of craniomaxillofacial, trauma, tumor, orthognathic surgery, as well as facial and esthetic surgery.

The focused expertise of seven disciplines is synthesized together to offer comprehensive and unique interdisciplinary perspectives, necessary to create the "team" approach fundamental to achieving the progress required and expected in high-level medical centers: oral and maxillofacial surgery, plastic and reconstructive surgery, otolaryngology, neurosurgery, ophthalmology, oculoplastic surgery, and head and neck surgery. Nowhere else has there been such a thorough and comprehensive multispecialty approach presented in the head and neck region.

The advent of microvascular surgery, skeletal analysis, computerized surgical planning, personalized implant creation, and comprehensive radiographic analysis have given rise to new principles, techniques and possibilities, which are explored extensively in this new textbook. *Advanced Craniomaxillofacial Surgery* should be part of every surgeon's library.

- *Atlas of Craniomaxillofacial Osteosynthesis: Microplates, Miniplates, and Screws*, Haerle, 240 pages, 2009, \$219.99.

CONTENTS**1 Bone grafts, bone flaps, bone replacement materials and techniques**

- 1.1 Types and harvest of bone grafts and bone flaps
- 1.2 Bone lengthening by distraction
- 1.3 Ceramic bone substitute materials
- 1.4 Growth factors for craniomaxillofacial applications

2 Ablative and reconstructive surgery of the mandible

- 2.1 Access osteotomies in the mandible in tumor surgery and osteosynthesis
- 2.2 Mandible resections without loss of continuity (rim resections)
- 2.3 Benign noncontinuity intraosseous lesions
- 2.4 Segmental defects, defect bridging, reconstruction with free nonvascularized bone grafts
- 2.5 Reconstruction of the condyle
- 2.6 Mandible reconstruction with microvascular free flaps
- 2.7 Reconstruction with prefabricated flaps

3 Ablative and reconstructive surgery of the midface and craniofacial junction

- 3.1 Approaches and access osteotomies to the midface
- 3.2 Midface resection and reconstruction
- 3.3 Ablative and reconstructive surgery of the orbit
- 3.4 Secondary frontal sinus surgery
- 3.5 Access surgery to the skull base
- 3.6 Reconstruction of the skull base
- 3.7 Reconstruction of the cranial vault
- 3.8 Secondary corrections after orbital/nasoethmoidal fractures

4 Correction of complex deformities and conditions of the craniofacial skeleton

- 4.1 Treatment of gunshot injuries
- 4.2 Treatment of malalignment and incorrect occlusion
- 4.3 Treatment of ankylosis
- 4.4 Ridge augmentation of the atrophic maxilla and mandible
- 4.5 Hemifacial microsomia—diagnosis, classification, and management
- 4.6 Cleft bone grafting and management of the alveolar ridge defect
- 4.7 Unilateral and bilateral total clefts
- 4.8 Distraction osteogenesis of the maxilla with external devices
- 4.9 Midface advancement with internal distractors
- 4.10 High midface osteotomies
- 4.11 Craniosynostosis
- 4.12 Orbital hypertelorism
- 4.13 Encephaloceles
- 4.14 Medication-related osteonecrosis of the jaw

5 Imaging and planning technologies

- 5.1 Endoscopy in mandibular condyle and midfacial trauma care
 - 5.2 3-D manufacturing technologies and their applications in craniomaxillofacial surgery
 - 5.3 Navigation and computer planning in craniofacial reconstruction
 - 5.3.1 Introduction
 - 5.3.2 Image analysis: data acquisition and processing
 - 5.3.3 Virtual models and segmentation
 - 5.3.4 Biomodels
 - 5.3.5 Intraoperative navigation
 - 5.3.6 Intraoperative imaging and quality control
 - 5.3.7 Surgically preformed implants: nonpatient specific
 - 5.3.8 Industrially preformed orbital meshes
 - 5.3.9 Preformed mandible plates
-

5.3.10 Patient-specific mandible implants

5.3.11 Patient-specific implants for craniofacial reconstruction

5.3.12 Computer-assisted surgical planning and execution: models, cutting and drill guides, positioning aids, and patient-specific implants

5.3.13 Orthognathic surgery and automated splint manufacturing

5.3.14 Interspeciality interface in head and neck oncology? current clinical use of computer-assisted surgery and future perspectives

5.3.15 Computer-assisted techniques in orbital surgery for thyroid eye disease

6 Principles and techniques for facial allotransplantation
